

Role: Organic Social Analyst

Format: Please deliver your response in a slideshow format (PowerPoint, Google Slides, Keynote etc). You will be asked to share your screen to present.

Purpose: We are looking for a response that is insightful, accurate and visualises the data in an accessible, interesting way

Context:

- Logitech is a global leader in designing and manufacturing peripherals and software that power better experiences across work, play, and creation. With a portfolio of products spanning keyboards, mice, headsets, streaming gear, and more, Logitech caters to gamers, professionals, and everyday users alike. The brand is known for its focus on innovation, sustainability, and human-centered design.

Currently, Logitech has an active organic social presence on Instagram, TikTok, Facebook, and LinkedIn.

This task focuses specifically on Logitech's Personal Workspace Solutions (PWS) handles, which represent its main consumer-facing social channels.

Task:

The purpose of this task is to assess Logitech's organic social media performance in Q2 2024, with Q1 2024 used as a comparison point. Your goal is to surface key insights across Facebook, Instagram, TikTok, and LinkedIn, and provide clear recommendations on how to improve organic social activity based on those insights.

Questions:

- Provide an overview of Q2 performance, using Q1 as a benchmark
- What type of content should we continue or discontinue to ensure success?
- How engaged are Logitech's users with the content, and why?
- Is Logitech succeeding at driving reach and engagement? Why or why not?
- What is your recommendation for future activity?

The above questions are provided as a guide, but if you find any additional insight in the data please include that too.

Data: The data [provided](#) for this task comes from Logitech's Personal Workspace Solutions (PWS) handles, which are the brand's main organic social media accounts. The data covers Q1 and Q2 2024 across Instagram, TikTok, Facebook, and LinkedIn.
